Ayush Tripathi

Frontend Developer

---

hey there, I'm ayush, a full-stack web developer

build app with beautiful UI. And I am happy because I following my passion and my own interest

about

---

so, I am a full-stack developer but the majority of work is on frontend development with Reactjs.

Currently, I am working on LISTIEE.COM as a front-end developer. And on the other, I am pursuing my bachelor of engineering (BE) with the Computer science engineering (CSE) branch and there I am in my third year. So, if I talk about languages, packages, and libraries with which I am familiar are Javascript, Reactjs, Redux, Nodejs, Expressjs, MongoDB, CSS, Styled-components, framer-motion, bootstrap, material UI, etc.

Some Application Which I am using majorly for working are one of my favorite VSCode, Spotify, WSL(windows subsystem for Linux), Discord, Notion, Chrome, Figma, BraveBrowser, etc.

In the past, I have learned C++ and some basic Algorithms and I have participated in competitive programming platforms like Codechef.com, Hackerrank.com, etc.

Outside this, I love to play CS:GO&BGMI and watch web series andandand.. traveling fun fact: I am also a driver because I love to drive my car.

work experience

---

frontend developer

listiee.com (oct, 2021 - feb,2022)

what I absolutely love working with

Reactjs, Redux, Javascript, Nodejs, Expressjs, MongoDB, APIs, Styled-components, Framer-motion, Bootstrap, Material UI, Rellaxjs, Sass, and some more...

projects and blog

I made some projects on Reactjs like

EcommerceWebsite— this site made on Reactjs. some more technologies used are Nodejs, Expressjs, mongooseDB, Framer-motion, Styled-component, Material UI, etc. this project made for the practice. It have lots of features like ? SignIn:SignUp, filter collection, cart, etc. It hosted on Firebase.

🔗https://ecommerce-bigstore.web.app/

Portfolio— this is my own portfolio which based on Reactjs. here also we used many technologies like Reactjs, Redux, Styled-components, Material UI, Framer-motion, etc. this is basically informative site which my details like about, my project on which I worked, my blog which I write with my own experience, my contact details, etc. This web is hosted on firebase.

🔗https://imayush-portfolio.web.app/

Online Compiler—   this is the compiler which build on Reactjs. the technologies used are Nodejs, Experssjs, JoodleAPI, Reactjs, Redux, Material UI, Styled-components, Framer-motion and more... this online complier have lots of features like it can compile the code, it can supported C++, Java, Python ... and it hosted on Firebase

🔗

WeatherApp— this webapp based on Reactjs. actually this was very small project means only Reactjs & Framer-motion. One more thing i used on this project that is RestAPI(it is open-source restAPI which fetch the weather data of any coordinate) this made for practice like how to use restAPI oor hoow to fetch data from API... .
